24 March:	
completed	18
ongoing (half way)	111
recently started	70
contracts in preparation but not signed yet	26
total	225

From the newsletter of the Maladeh foundation: <http://www.stichtingmaladahgambia.nl/>

Er worden momenteel twee lokalen bijgebouwd, waardoor in september het probleem helemaal is opgelost. Deze snelle realisatie hebben we te danken aan de steun van MRC-Holland Foundation. Mede door deze stichting kunnen we op korte termijn een start maken met het bouwen van lerarenverblijven waarin zij gedurende de week kunnen wonen. Er komen tien kamers voor leerkrachten. Hierdoor is het makkelijker om hen aan de school te binden. Nu moeten ze soms dagelijks vele kilometers lopen. Mensen haken hierdoor soms af wat voor de continuïteit niet erg bevorderlijk is. Met de bouw van dit verblijf behoort dit probleem tot het verleden.

We provided a loan to three small contractors for buying more professional machinery.

Mail from stichting Kinderen van Lamin (<http://www.kinderenvanlamin.nl/>) :

Betreft doktersposten.

Deze keer geen bedelbrief of een voortgangsrapportage maar wel een goed bericht:

Van de Wilde Ganzen hebben wij toegezegd gekregen een bedrag van ruim 32000 euro en met jullie bijdrage van 50.000 euro en dat van diverse andere sponsors hebben wij nu bijna 100.000 euro bij elkaar en is de bouw van de eerste dokterspost van start gegaan in Bussumbala

De voorbereiding voor de bouw en inrichting van de andere 3 posten is in volle gang en wij hopen daar binnen enkele weken mee te kunnen starten.

In principe zijn het simpele gebouwtjes waar 2 of 3 dagen per week een dokter met een staf van 4 mensen spreekuur houdt en gratis malaria tabletten verstrekt. De medische staf wordt vervoerd vanuit het Lamin Health Center met onze ambulance en zijn er ernstige patiënten dan worden deze ook met de ambulance vervoerd naar het Health Center of naar het grote ziekenhuis in Banjul.

The new school building in Mandinary that will be taken into use in September 2016. Picture 26-05-2016

The new water tower in Mandinary. Picture 26-05-2016

Furniture is manufactured for the school in Mandinary.

The first school furniture from a new supplier.

We hope to reach a production of more than 400 pieces / month later this year.

Construction of the new building in Kombo Kerawan

Batteries for the new solar system of the basic school in Sifoe.

Solar system for the school in Sifoe.

Girls in Brufut.

Water project in Burkina Faso

Eindelijk water na drie negatieve boringen in 3 andere dorpen.

Nu op 29 meter diepte is er toestroom van ondergrondse water. 1000 liter per uur neem ik aan !

De blauwe mantelbuis met hele fijne sneedjes /gleuven wordt geplaatst , en tussen deze mantelbuis en het boorgat in wordt filter materiaal (fijn grind en grof zand) gestort.

In de blauwe buis komt de opvoerleiding voor de touw-pomp.

De boormachine met geleidings profiel ligt op de aanhanger.

Namens het bestuur van Stichting Steunfonds Sahelprojecten,  
Huib Povel.
